

Lura Libby School

November Newsletter

A Note from the Principal...

What a wonderful two weeks it has been. What a difference a year makes. Last year during this same time span we missed three days of school due to a power outage from a storm. This past two weeks the weather has, for the most part, been lovely. As I write this, the sun is shining brightly outside the school and students are happily heading to recess outside. Please look at our upcoming calendar of events to see what's ahead. Our festive fall events from October 30th are also highlighted in this newsletter because the newsletter had to go out on the 30th before those events could be included. Have a wonderful end of November!

Important Dates	
Family Movie Night Doors open at 6:10, movie starts at 6:30	11/13
End of trimester 1	11/24
Thanksgiving Break	11/25- 11/27
Report cards issued	12/7
LLS Winter Concert	12/18
Cookies with Santa	12/19

The Costume Parade at LLS

Lura Libby School students celebrated fall on October 30th. They participated in a Fall Wellness Walk/Costume Parade with friends and family members in attendance to see their wonderful costumes. Part of the walk took them by Thomaston Grammar School and Oceanside High School West where staff and students were lined up outside to watch the parade and cheer students on. Students then continued the festivities in their classrooms. It was a fun afternoon for students and staff.

Focus Class - Grade 3, Miss Anthony

It has been an exciting start to the year in our classroom. We have enjoyed learning so many new and exciting things. One of the students' favorite units we have done so far this year was our habitat science unit. Our class created three different habitats for three different species. They created a habitat for Millipedes, Fiddler Crabs, and African Dwarf Frogs. The students worked hard during this unit and became mini scientists by observing and learning about each animal's habitat. They also had a lot of responsibility when it came to tending to their animals and habitats. They had to feed each animal and tend to each habitat. They quickly learned that habitats are different and require different materials in order for something to live there. It was sad to end our science unit but they are excited to move on to learning about Native Americans.
